

Course Syllabus Biol 414 Lab Summer 2025

Contact Information:

Keith Legro
email: keith.legro@unh.edu

Participation/Attendance:

You will want to be sure to keep up with the material weekly.

Canvas (My Courses):

All of the materials for this lab are found here on Canvas. There are several Modules containing a variety of information sources from power point presentations to outline documents as well as some video media. You will want to study all of the information sources for each module in advance of taking the quiz on that material.

Grades:

Your grade for this lab will be based off of your grades on the quizzes and Lab Exam's you will take on the material. The point values of each of these are listed on the lab outline document. The lab Exams are not cumulative so the first will cover the material leading up to it and the second one will cover the material that is looked at after the first exam.

Schedule:

Classifications of Life	June 23-24
Bacteria	June 25 – Jun 27
