

General Chemistry I Summer 2018
Synchronous Online Lecture – 9am- noon M/W/Th
Labs - in person on campus (syllabus distributed separately)

Lecture Instructor – Dr. Sarah Prescott (Dr. Prescott is preferred salutation)

Lab Instructor – Dr. Reynolds

How to contact – please use messaging feature on mycourses

Course Text – available freely online, link provided in course module

Lab Required Materials- Lab coat, available at Work N' Gear, 1111 South Willow Street, Manchester, 626-9222

Safety goggles: Purchase your own or wear the lab's "community goggles"

Learning Objectives: Upon successful completion of this course, students will:

- Understand and be able to explain the fundamentals of chemistry, with particular emphasis in the areas of; measurement/conversions, atomic and electronic structure, ionic and covalent bonds, molecular structure, stoichiometry, chemical reactions, thermochemistry, and gases. *Learning objectives specific to each of these general areas is available on the course site in each module.*
- Improve their problem solving and critical thinking skills, including the process of peer review
- Increase their awareness of and use of digital literacy and skills

Grading Distribution – You can access your lecture grades at any time via mycourses. Below is a percentage distribution of all components towards your final lecture course grade. Outline of each component is included in this syllabus. See online course modules for more information. Your lecture course grade comprises 80% of your total course grade; the lab component comprises the other 20%. Lab grades and syllabi will be distributed separately by your lab instructor.

Lecture Course Grade (80% of total)

Assignments and Team Participation 10%

Homework 10%

Quizzes 10%

Exams (2, 25% each) 50%

Course Format

Online Format: The format of this course is different from a traditional lecture format. Class participation and independent preparation are key requirements for doing well in this course. You are expected to log in for each class session having fully prepared on your own for class (see Class Study below and on course site). There will be no formal lecture in this course, although you will review recorded lectures as an important part of your learning experience. Class sessions will be devoted to discussion of the pre-class assignment problems and for addressing any additional student questions. No formal lecture is presented during class sessions. Sessions will vary in length and depend on amount of time needed to discuss questions, but will not exceed scheduled time.

Students that are most successful in this type of course are those that are motivated to learn, responsible, able and willing to learn independently.

It is the student's responsibility to have access to a reliable internet connection for this course. Computers on campus are available for your use in this course and support for them is provided.

General Assignment notes

- o Assignments (except exams) are open notes, books, but you may not consult another person, either in written or electronic form. The HONOR code is in effect for completion of assignments. Should you discover a fellow classmate not adhering to this honor system, you are required to report the same. Violation of this code constitutes academic misconduct. All answers shall be in your own words. Copying from any source constitutes academic misconduct and will be treated according to UNH policy.
- o There are **no makeups** – please take note on specific due dates for each item as described on the course schedule. **Late assignments will not receive credit.**

- o You may print out course documents for your sole use in reviewing material. You may not share course documents.

Description of Assignments (see course site for more details on each)

Assignments and Team Participation

- Used to prepare you for the class discussion. If there are any questions you had difficulty with, make a note of them so that you can ask during the class session. It is expected that students will come to the class sessions with questions ready to ask.
- Grading will be done based on timely, full and thoughtful completion.
- Most of the assignments are pre-class. There are additional assignments (about me video, team survey) that are designed to improve connection among peers and create a connected learning environment.
- To facilitate active learning both in and out of class sessions, teams will be assigned to work on problems in class sessions
- Participation will be evaluated on an individual basis by team members and instructor
- Students should plan on actively participating during in class sessions, and working collaboratively with their team on all tasks as assigned

Homework

- Designed to practice new knowledge and problem solving skills
- Grading is done based on thorough and thoughtful completion of all tasks as assigned

Quizzes

- Designed to keep you on track with your study and review of the material.
- The lowest quiz score will be dropped from your overall course grade for this component.

Exams

- Summative evaluation of your understanding and application of key concepts.
- Two exams as listed on the schedule that you will take in person on campus. You have the entire class time to complete them. No other lecture activity is planned on exam days, but you will have lab as scheduled.
- You will need a scientific calculator.. You do not need a graphing calculator, just one that can perform exponents, scientific notation, and logarithm functions. You may not share calculators.
- You will be provided with a periodic table to use, a copy of which is posted on the course site. You may not use your own table.
- Questions will be similar to those from pre-class and quizzes.
- You may bring one 3x5 notecard with formulas written on it. Notecards may not be shared or copied, and will be submitted with exams.
- Use of cell phones and other electronic devices during exams is strictly prohibited. Having a cell phone in sight during an exam will be automatically considered academic misconduct and you will receive a zero on the exam. Additional actions may be taken by discretion of the instructor and in accordance with university policy.
- You may leave the exam room when complete, but may not exit/re-enter.
- Photo id must be presented when submitting completed exam to verify id.
- All belongings will be left at the front of the room upon entering exam room and can be retrieved once exam is submitted.
- Exams score sheets will be given back to students to see score/grade. There will be limited access to exam solutions. Further instructions will be provided on the course site.

Course Policies and Important Notes

Use of Technology: Mycourses will be used extensively in this course to facilitate efficient communication, post course documents and feedback. The Announcements section will be used to communicate all important course information. Use the messaging feature to ask any questions of the instructor.

Zoom (online conferencing tool accessed from within the course site) will be used for all weekly synchronous online class sessions. You will need to be able to hear as well as use your microphone (built in is fine). You will be asked to post a video introduction as an assignment outside of class sessions. The video assignment is designed so that we can create a connected learning community in the course. You will want to be in a location that you can talk to contribute to discussion, participate in your teamwork, and ask questions. The primary means of communication during course sessions will be by audio. Text chat communication will be reserved for private messages to the instructor or when otherwise instructed. DO NOT use a mobile device for class sessions, as you will not be able to actively participate. A laptop or desktop should be used for class sessions. Come to class sessions prepared to perform calculations and discuss. Always bring calculator to class sessions (cell phone calculator is NOT sufficient). Using the Zoom tool will be discussed during the first class session. Select the direct

link in the course site to access the Zoom class session.

Any instructor class cancellation or change notification will be done through an announcement on mycourses.

It is the student's responsibility to have access to a reliable Internet connection for this course. Computers on campus are available for your use in this course and support for them is provided.

Student support: Students with physical, psychological, or learning disabilities who need classroom and/or testing accommodations must register with the Academic Counseling office. Accommodations will be made in accordance with university policy and procedure.

Cheating/Plagiarism: Copying of another's work is never permitted in this course. Cheating or plagiarism of any kind will result in course failure at the discretion of the instructor. Definitions of and procedures for dealing with academic misconduct will follow University policy.

Academic Honesty

The Biology Program at UNH Manchester will strictly adhere to the University policy on academic honesty, as published in the UNH Student Rights, Rules, and Responsibilities Handbook (<http://unh.edu/vpsas/handbook/academic-honesty>). By turning in any piece of work in this course, you declare that you have read and understand the policy, and that you did not engage in any form of academic dishonesty as defined in the Handbook.

Plagiarism can take many forms, such as: submitting someone else's work - in whole or in part - as your own; collaborating on answers for individual assignments, or allowing your own work to be used by another student; copying information from a web site or other text without proper documentation; buying a pre-written paper or lab report.

Cheating is mainly concerned with copying on exams or in lab, bringing crib notes into an exam or referring to notes or the textbook or any other source such as a programmable calculator, tablet, or cell phone during an exam. All electronic devices must be turned off and put away for the duration of the exam. Ear buds are not permitted.

Any instances of cheating or plagiarism will result in consequences that can range from a failing grade on the assignment for all students involved to dismissal from the University, as defined in the UNH Student Rights, Rules, and Responsibilities Handbook.

Should you have any questions regarding any of the above policies, it is your responsibility to contact me to discuss any concerns. This syllabus serves as a contract whereby you agree to all of the policies herein. This syllabus is subject to change at the discretion of the instructor.
