

CHEM 403: GENERAL CHEMISTRY LABORATORY

Fall 2021

Instructor John Welsh

Email: jhw1019@unh.edu

Lab Meetings: Tuesdays 6:00-9:00pm

Wednesdays 6:00-9:00pm

Laboratory: 88 Commercial St., Room 574

Course Policies

The General Chemistry lab is a supplement to the General Chemistry lecture. As such, it counts as 20% of your total grade in the course. Please note that you must pass the lab in order to pass the course. There are no lab make-ups, except in the event of a school cancellation. Two or more unexcused absences from lab will result in a failing grade for the ENTIRE CHEM 403 COURSE.

You are expected to attend your scheduled lab section; students will not be allowed to switch lab sections. You have the option to switch to online labs anytime during the semester, however you will not be permitted to switch back to in person labs once you do so.

You are expected to be in the lab on time and prepared to start that day's experiment. This means that you have read the background and procedure for the experiment and have completed the experiment's pre-lab questions. This also means that you will enter the lab wearing appropriate clothing and shoes. Your instructor may provide you with additional laboratory policies specific to their laboratory sections.

Laboratory Materials

Handouts of the procedures and pre-lab questions will be provided in lab. Copies of these handouts will also be available to view on myCourses. You will also need to record and submit your data and observations for each experiment, but you will not need a dedicated laboratory notebook.

A graphing calculator is strongly recommended, but at the very least a scientific calculator is also required to perform calculations during the lab. A cell phone is not an acceptable calculator. **Cell phone use of any kind is not permitted during the lab.**

Appropriate clothing must be worn in the laboratory. Lab coats and protective eyewear must also be worn while performing all experiments. These items can be purchased online through the UNHM bookstore, or at Work'n'Gear on South Willow St. in Manchester. "Community" goggles are available, but it is recommended that you have your own pair. Shoes must have closed toes and cover the top of the foot; no sandals or flip-flops are allowed. Suitable clothing

should be worn underneath lab coats; shorts, capris and short skirts are inappropriate for lab work. If you are not dressed appropriately for lab, you will not be allowed to perform the experiment, and you will receive a zero for that experiment.

Mask policy: masks are mandatory in the lab, no exceptions. You are expected to wear a mask when you arrive to lab, during lab, and until you leave. Anyone refusing to wear a mask will be escorted out of the lab by security, given a failing grade for the experiment and not permitted back for the rest of the semester. No exceptions will be made.

Grading

Labs will be graded on a 20-point scale:

6 points – Pre-Lab Assignment

14 points – Data and Calculations pages

Pre-lab questions must be attempted and completed before each lab; incomplete assignments at the beginning of class will receive a 10% grade deduction (2/20 points). Corrections can be made to the assignment after finishing the experiment, but students are expected to attempt this assignment prior to coming to lab. In-lab observations and the “Data and Calculations” pages along with any post-lab questions are to be completed immediately after the experiment and submitted before leaving the lab.

Class Cancellations and Delayed Openings:

UNH Manchester makes weather-related decisions independent of UNH Durham. For information on cancellations and closings, call the UNH Manchester Information Line at **603 641 4100**, or visit the UNH Manchester website.

Closing and delay information will also be announced on the following stations: WMUR Channel 9 TV; WGIR 101 FM and 610 AM; WJYY 105.5 FM; WMLL 96.5 FM; WOKQ 97.5 FM; WZID 95.7 FM; WFEA 1370 AM.

A weather-related cancellation of one lab meeting does not necessarily mean the other labs will be cancelled for that week; if campus is open for your scheduled lab time, always assume you will meet for the experiment as scheduled. Any changes to the lab schedule will be announced on myCourses.
